

Corporate Development Services

On-demand corp dev pods for Apollo portfolio companies.
Lean teams, vetted analysts, transparent pricing.

Prepared for Apollo Talent Team

Private and confidential

CONTEXT

Corp dev work is spiky and hard to staff

Deal flow doesn't follow headcount plans. When a target surfaces or diligence kicks off, you need analytical firepower now, not in three months.

 Engage a consultancy

Senior-heavy staffing models mean \$3-6K per day for a junior consultant. Most of that is the firm's overhead, not the talent. Weeks of scoping before work begins.

 Find freelancers

Quality is wildly inconsistent. No oversight, no team structure, no continuity between engagements. Only 25% of executives report improvement in outsourced service quality.

 Hire and train

35 days average to fill the role, months to ramp. A permanent solution for a spiky need. You're over-staffed between deals and under-staffed during sprints.

 So the work flows up to your deal teams

When port cos need help with target screening, modeling, or integration, senior investors end up doing associate-level work. That's expensive time spent on execution, not decisions.

Gratia solves for this

On-demand analyst pods staffed with vetted, banking and consulting-trained talent. A structured model with dedicated manager oversight and QA gives you more control than a freelancer, which matters in M&A contexts. Team stood up in weeks, timezone-aligned, scales with your deal flow.

WHY GRATIA

Tier-1 talent. Integrated delivery. Fair price.

What Apollo port cos get with us that they don't get from consultancies or freelancers.

01

Tier-1 talent

Analysts from MBB, IB, and PE backgrounds. Same quality you'd expect from Bain PEG or a top-tier consultancy.

02

Right price point

Execution-focused model without senior partner overhead. Strong talent, competitive rate, transparent pricing with no surprises.

03

Deeply embedded

We work integrated with your team day-to-day, not parachute-in and hand off. Real ownership, Slack access, weekly cadence.

04

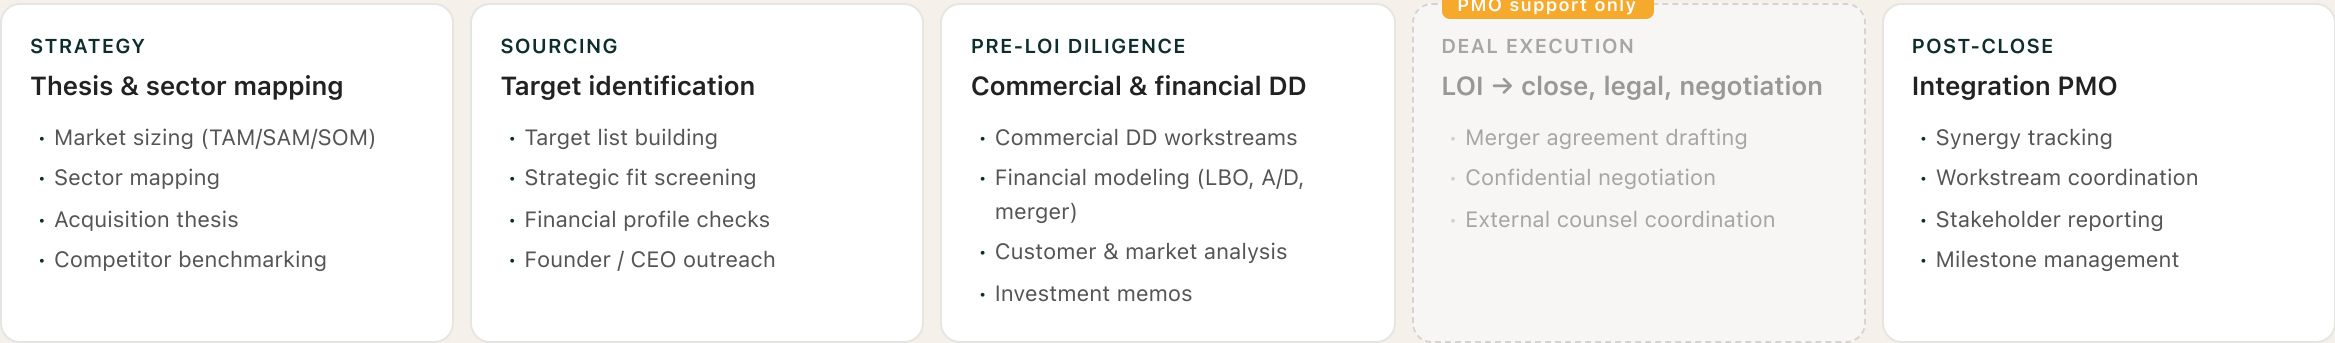

Apollo context

Already across 12 active projects in 5 Apollo teams. Less ramp, less context-setting, faster delivery.

WHERE WE PLAY

We cover the analytical workstreams across the M&A cycle

Deal execution and confidential negotiation stay with your team. Everything else we can own or support.

HOW WE PLUG IN
We deliver on a **dedicated pod** basis (multi-analyst team with a manager), as **embedded seats** reporting into your head of corp dev, or on **project-specific briefs** for bounded deliverables.

Examples from our current bench

Every analyst is vetted through skill tests, timed project simulations, and live interviews before they reach a client.

REFERRAL & TRACK RECORD

From referral to team in days

EXAMPLE ENGAGEMENTS

ENDEAVOR

Add-on acquisition pipeline support

Rebuilt financial models, sourced and screened acquisition targets, executed direct outreach to founders and CEOs, and supported leadership fit assessments.

"The whole process of working with Gratia was smooth and efficient, and the quality of their work was very high."

Austin R., Finance Lead, Endeavor

APOLLO · 12 ACTIVE PROJECTS

Gratia is already embedded across five Apollo teams

COMPLETED

Team Tracking Platform, Onboarding Benchmarks, AI Top-Down Strategy

IN PROGRESS

Kissflow SMA Onboarding, Business Cases & QBBs, APPS Portfolio View, Consultant Tracking CIQ, and more

"Highly professional, strong change management, delivered above and beyond. Will continue utilizing for future projects."

APPS Team, Apollo

How we staff and maintain quality

Speed when deal flow spikes. Quality controls that stay on throughout the engagement.

1

Brief in, team out
Share the scope: target screening, model build, diligence workstream. We match from our vetted bench in days, not weeks, or start a custom search.

Skill-matchedDays to staffScoped up front

2

Analysts vetted before they reach you
Every analyst clears a 6-stage pipeline: screening, live interviews, skill assessments, and a timed project simulation scored by AI and human reviewers.

<5% pass rate6-stage pipelineDual-layer QA

3

Quality stays on during delivery
A Gratia manager oversees every engagement with weekly status, escalation paths, and structured mentorship. Deliverables are reviewed before they reach you.

Recommended

Dedicated pod

From ~\$100K/month

4-6 full-time analysts with 2 managers at 50% allocation. The pod operates as an extension of the port co team. Weekly status, Slack access, integrated workflow. Scales up or down with deal flow.

Example: Ongoing M&A pipeline support. Target screening, modeling, diligence prep, leadership slides.

Interim seat

From ~\$25K/month

One analyst embedded directly with the port co corp dev team for 3-6 months. Reports to their head of corp dev. Gratia handles QA and mentorship in the background.

Example: Port co is between FT hires and needs coverage for Q3 deal pipeline.

CODE	ROLE	RATE
BA3	Business Analyst	\$75/hr
BA4	Senior Business Analyst	\$95-\$125/hr
L1	Lead Business Analyst	\$125-\$250/hr
M1	Business Analyst Manager	\$195-\$295/hr

All analysts are timezone-aligned with your team. Rates reflect the seniority and specialization required.

Let's work together.

APPENDIX

Proposed recruitment process for corp dev roles

RECRUITMENT PROCESS

How we source and vet analysts for corp dev

Pre-screening filters for corp dev

- ✓ 3+ years in investment banking, PE, consulting, or corporate finance
- ✓ Demonstrated financial modeling proficiency (LBO, DCF, merger models)
- ✓ Experience with M&A processes, due diligence, or integration work
- ✓ Strong written English, client-facing communication skills
- ✓ Available for 30-40 hrs/week, overlap with ET business hours

Target geographies

LATAM Top-tier university graduates with Big 4, MBB, and banking backgrounds. ET-aligned timezone overlap.	South Africa Chartered accountants and finance professionals from leading institutions. Strong analytical training, GMT+2.
--	--

ASSESSMENT FRAMEWORK

Skill areas by workstream

Assessments are tailored to the workstream. Different roles require different skill weightings.

SKILL AREA	TARGET SCREENING	FINANCIAL MODELING	DUE DILIGENCE	INTEGRATION PMO	MARKET RESEARCH
Financial Modeling & Valuation					
Numerical Reasoning					
Critical Thinking					
Attention to Detail					
Market Research & Sizing					
Business Judgment					
Communication & Presentation					
Project Management					
Data Analytics					

Required Considered

Example simulation and evaluation

Sample simulation brief

- Scenario:** A PE-backed education platform (\$100M revenue) is evaluating three add-on acquisition targets in adjacent verticals. You have 3 hours.
- Deliverable 1:** Screen three targets on strategic fit, financial profile, and integration risk. Recommend one.
- Deliverable 2:** Build a simple accretion/dilution model with at least two scenarios.
- Deliverable 3:** Draft a one-page executive memo for the investment committee.

Scoring rubric

Analytical accuracy	Are the numbers right? Does the model hold?
Strategic reasoning	Is the recommendation defensible?
Structure & clarity	Could a VP read this cold and act on it?
Time management	All three deliverables complete within 3 hours?

Sample evaluation output

Candidate evaluation report

Financial Modeling & Valuation	92
Numerical Reasoning	88
Critical Thinking	85
Attention to Detail	74
Market Research & Sizing	90
Business Judgment	87
Communication	78
Project Management	83

Reviewer note: Strong modeling instinct. Accretion/dilution model was clean with reasonable assumptions. Memo was well-structured but could sharpen the "why not" on the two rejected targets. Ready for BA3-level corp dev work.
